There may be additional cost involved for practical examination*.

ISS is offering this course online to enable the continued availability of training, without compromise of quality. Some elements of the course require completion of practical assessments. Awards cannot be made unless these practical assessments have been completed. We are working to seek approval for alternative assessment methods, but these have yet to be confirmed. Until final approval for alternative arrangements has been granted, the award can only be achieved by the completion of the face to face practical assessment

Topics:

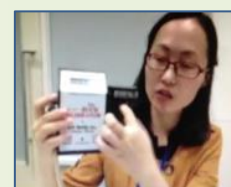

- Physiology and Toxicology
- Risk Assessment – need, methods and tools (including Case Study)
- Industrial Hygiene Global Standards
- Air Monitoring Theory and Practice (including case studies)
- **Bonus-** Quality assurance during Quantitative Exposure Assessment
- **Bonus-** Lessons learned from air monitoring at 100+ industries
- Biological monitoring and sample analysis
- Air monitoring – Dust, Fumes & Fibres (with case studies)
- Air monitoring – Vapors and gases (with case studies)
